February 18 - Commission Meeting at 8:30 AM

February 25 - Commission Meeting at 8:30 AM

Proclamation

26-01

Survivors of trafficking are among the most vulnerable of individuals, and we must work together to address the root causes as well as create sustainable recovery options for those who have survived these atrocities. Survivor perspectives are important to solving the root causes and it is important to include survivors and to keep those survivor-informed perspectives at the forefront of initiatives.

Organizations that are taking the lead on human trafficking initiatives in Franklin County, KS, include but are not limited to the following: Ottawa Police Department, Franklin County Sheriff's Department, Franklin County Attorney's Office, Wellsville Police Department, The Sexual Trauma & Abuse Care Center, Elizabeth Layton Center, Advent Health, Franklin County Coalition to End Homelessness, Ad Astra Advocacy Center of Franklin County, Ottawa University, Neosho County Community College, Unified School Districts #290, #289, #288, & #287, and the Willow Domestic Violence Center.

Whereas, Human trafficking, a modern form of slavery, is one of the largest and fastest-growing criminal industries in the world, and is based on recruiting, harboring, and transporting people for the purpose of exploitation; and

Whereas, Sex trafficking and labor trafficking occur in Kansas, and both adults and children of any gender, socio-economic status, age, race, sexual orientation, or geographic location can become victimized; and

Whereas, Human trafficking includes sexual, verbal, emotional, economic, and physical abuse and exploitation, and all forms of abuse carry long-term complex trauma implications; and

Whereas, Kansas human trafficking laws define commercial exploitation of children, which does not require a showing of force, fraud, threat, or coercion and references the existing statutory definition of human trafficking and aggravated human trafficking; and

Whereas, The effects of human trafficking reach far beyond its victims and perpetrators, causing disruption in our schools, places of work, and neighborhoods; and

Now Therefore, the Franklin County Board of Commissioners do hereby proclaim the month of January 2026 as Human Trafficking Awareness Month and urge the citizens of Franklin County to speak out against sex and labor trafficking and exploitation, to support survivors of these heinous crimes, to encourage community leaders to hold offenders accountable, and to make preventable efforts a priority by hosting events, by creating policies at work, school, and home, and by supporting and participating in programs designed to reduce and eventually eliminate human trafficking as a societal problem. As a community, we will commit to creating and executing a comprehensive, collaborative, and trauma-informed response for the safety and security of human trafficking survivors.

HUMAN TRAFFICKING AWARENESS MONTH

January 2026

Signed this 28th day of January 2026.

Sabrina Meador, Commission Chair

Attested and Recorded this 28th day of January 2026.

Janet Paddock, County Clerk

**Board of County Commissioners
Franklin County, Kansas**

Resolution 23-*21*

DocId:8001340

Tx:4000981

FILED FOR RECORD
05/16/2023 08:06 AM
VICKI HUGHES
REGISTER OF DEEDS
FRANKLIN COUNTY, KANSAS
INSTRUMENT # 2023-01524

A RESOLUTION OF THE FRANKLIN COUNTY BOARD OF COUNTY COMMISSIONERS APPROVING AN ADDENDUM TO THE FRANKLIN COUNTY ZONING REGULATIONS GRANTING A TEMPORARY MORATORIUM ON THE PLANNING, ESTABLISHMENT, CONSTRUCTION, APPLICATION FOR OR PERMITTING OF ANY SPECIAL USE PERMITS FOR COMMERCIAL WIND ENERGY CONVERSION SYSTEMS IN THE UNINCORPORATED AREAS OF FRANKLIN COUNTY, KANSAS, UNTIL DECEMBER 31, 2026.

WHEREAS, Franklin County, Kansas, is a county municipal government, organized pursuant to K.S.A. 19-101; and

WHEREAS, the Franklin County Board of County Commissioners adopted Resolution # 23-91 creating the Franklin County Planning Commission as provided in K.S.A. 12-744; and

WHEREAS, the Franklin County Board of County Commissioners adopted the Zoning Regulations of Franklin County, Kansas, on August 4th, 2002 as provided in K.S.A. 12-747; and

WHEREAS, the Franklin County Planning Commission published notice on March 29, 2023, that a public hearing would be held to consider amendments to the Zoning Regulations of Franklin County, Kansas, as required by K.S.A. 12-757; and

WHEREAS, on April 20, 2023, the Planning Commission held a public hearing for the consideration and adoption of said addendum to the Zoning Regulations as prescribed by K.S.A. 12-757; and

WHEREAS, the Planning Commission, after due consideration of all written reports and public comments is concerned that the Zoning Regulations, as currently written, may not adequately address adverse effects that Commercial Wind Energy Conversion Systems located in the unincorporated areas of Franklin County may create.

WHEREAS, the Franklin County Board of County Commissioners adopts this Resolution and the moratorium set forth herein to provide time for the Board and applicable Franklin County officials, employees, agencies and departments to review the Franklin County Comprehensive Plan and Zoning Regulations, receive public input, hold public hearings and make recommendations for amendments to the Franklin County

Comprehensive Plan and Zoning Regulations to address adverse effects that Commercial Wind Energy Conversion Systems may create.

NOW, THEREFORE, Be It Resolved, that the Franklin County Board of County Commissioners, after duly reviewing the Planning Commission recommendation, together with all written reports and public comments regarding said addendum to the County Zoning Regulations, does hereby approve adopting the addendum to the County Zoning Regulations as follows:

SECTION 1: *Definition.* For purposes of this Resolution, the following phrases have the following definitions:

“RENEWABLE ENERGY SYSTEMS: A Wind Energy Conversion System (WECS) as defined in this section.

WIND ENERGY CONVERSION SYSTEMS (COMMERCIAL): A combination of mechanical and structural elements used to produce electricity by converting the kinetic energy of wind to electrical energy. Such systems consist of the turbine apparatus and related support structures and transmission improvements for the generation of electrical power for the purpose of off-site sale/resale for public use.

SECTION 2: *Temporary Moratorium.* Commencing on the date of this Resolution and continuing through **December 31, 2026**, the repeal of this Resolution if earlier, or such later date to which the Franklin County Board of County Commissioners may subsequently extend this Resolution, the Franklin County Board of County Commissioners imposes a temporary moratorium on the planning, establishment, construction, application for or permitting of any Special Use Permits for Commercial Wind Energy Conversion Systems in the unincorporated areas of Franklin County, Kansas. During the term of this moratorium, all Franklin County Officials, agencies, departments and/or boards charged with the responsibility for receiving, reviewing, processing and approving permits, site plans, applications and other requests relating to zoning, land use and construction of Commercial Wind Energy Conversion Systems are prohibited from doing so.

SECTION 3: *Reviewing, Adopting and Amendments of the Franklin County Comprehensive Plan and Zoning Regulations.* During the term of this moratorium, the Franklin County Planning Department and the Franklin County Planning Commission intend to undertake a review of the Franklin County Comprehensive Plan and Zoning Regulations, receive public input, hold public hearings and make recommendations to the Board of County Commissioners for permanent changes to the Comprehensive Plan and Zoning Regulations that address Commercial Wind Energy Conversion Systems.

PASSED AND ADOPTED by the Franklin County Board of County Commissioners this 10th day of May, 2023. This action shall become effective upon publication in the official county newspaper.

Franklin County C&D Landfill Expansion

TO: Peg Pearson and Jeff Welton, Franklin County, Kansas
FROM: Susan McCart and Tyler Warren, SCS Engineers
SUBJECT: Project Budget
DATE: January 22, 2026

SCS Engineers entered into a contract with Franklin County, Kansas in 2021 for professional services related to the Franklin County Construction and Demolition (C&D) Landfill. These services were primarily related to preparing a permit modification application for submittal to the Kansas Department of Health and Environment (KDHE) to allow expansion of the C&D Landfill. The maximum project budget approved by the County was \$252,000. Two additional cost approvals were authorized by the County for activities performed outside of the approved scope of services: \$22,200 in February 2022 and \$30,435 in June 2022. An approximate \$13,740 reduction to the approved budget was provided in 2022 due to a subcontractor billing error. The resulting total approved budget to date is approximately \$291,000.

During the course of the project execution, some of the proposed tasks were completed for significantly lower costs than anticipated in our proposal, and some additional tasks were requested by the County, or required based on changes to project assumptions and/or scope (such as incorporating the north-adjacent property following its purchase by the County). As agreed upon with the County, SCS performed the additional tasks without requesting additional cost approval, as sufficient project budget was available.

The permit modification application is ready to submit to the KDHE for their review. To date, SCS has invoiced a total of approximately \$264,000; therefore, our remaining budget is approximately \$27,000.

The attached summaries provide an overview of the project timeline, budgets, services, and remaining estimated fees. Please do not hesitate to contact us if you have questions or would like further details.

Thank you,

Tyler Warren
Project Manager

Susan L. McCart, P.E., P.G.
Senior Project Director

BUDGET SUMMARY

Franklin County, Kansas
C&D Landfill Expansion
SCS Project Number 27221262.00

Tasks		Total Approved Budget	Total Invoiced (through Dec 2025)	Remaining Budget	Task Status	Comments and Out-of-Scope or Extra Tasks Performed
Project Management, Kick-Off Meeting, and Progress Meetings		\$17,000.00	\$27,755.01	(\$10,755.01)	Ongoing	Original proposal assumed project would be complete in two years.
Task 1	Develop Landfill Footprint	\$10,000.00	\$9,010.00	\$990.00	Complete	Upon acquisition of north-adjacent property, revised the landfill footprint
Task 1.1	North-Adjacent Property Assessment	\$30,435.00	\$8,966.98	\$21,468.02	Complete	Add Scope Task to determine if north-adjacent property would be suitable for use with the landfill
Task 2	MSW Assessment	\$20,000.00	\$6,596.00	\$13,404.00	Complete	---
Task 3	Groundwater Separation Assessment	\$14,460.00	\$32,433.94	(\$17,973.94)	Complete	Additional drilling on north property performed as authorized during June 2023; budget was not increased due to underbudget tasks.
Task 4	Borrow Soil Evaluation	\$25,000.00	\$900.00	\$24,100.00	Potentially Pending	This task originally included evaluating off-site potential borrow sources. With the acquisition and assessment of the north-adjacent property (Task 1.1), this task largely has not been used. However, limited additional geotechnical testing may be requested by KDHE following their review of the permit modification application.
Task 5	Updated Topography & Volume Calculations	\$9,000.00	\$24,161.28	(\$15,161.28)	Complete	Original approval intended for only one year of volume calculations, completed in 2021. As requested by the County, SCS performed volume calculations during two additional years (2022 and 2024). The budget was not increased due to other underbudget tasks.
Tasks 6 & 7	Finalize Design, Update Existing Plans, & Permit Modification Application	\$125,000.00	\$154,434.40	(\$29,434.40)	Ongoing	Permit modification application is ready to submit to KDHE. Original budget was not increased following acquisition of north-adjacent parcel. See attached detail for out-of-scope/extra services performed.
Task 8	CAPEX Planning	\$40,000.00	\$0.00	\$40,000.00	Pending	Task intended to be performed while KDHE reviews the permit modification application or later.
Totals		\$290,895.00	\$264,257.61	\$26,637.39		

ADDITIONAL PROFESSIONAL SERVICES

Franklin County, Kansas
C&D Landfill Expansion
SCS Project Number 27221262.00

Tasks	Description of Out-of-Scope/Additional Services Provided
Project Management & Meetings	Additional project management due to longer time for project completion, including additional meetings with County or KDHE.**
Task 1 Develop Landfill Footprint	A revised landfill footprint was developed to incorporate the north-adjacent parcel.**
Task 1.1 North-Adjacent Property Assessment	An assessment of the north-adjacent property included: - Wetlands evaluation - Collecting soil samples for geotechnical analysis - Determining the overburden thickness <i>County approved the scope and additional budget for this task in June 2022.</i>
Task 2 MSW Assessment	<i>No additional professional services provided for this task.</i>
Task 3 Groundwater Separation Assessment	Original proposal assumed the existing monitoring wells would be sufficient for demonstrating groundwater separation. However, it was determined additional wells (piezometers) would be needed on the eastern portion of the property. <i>County approved an additional scope and budget for the installation of three piezometers in February 2022.</i> Following acquisition of the north-adjacent parcel, piezometers were needed to evaluate the groundwater separation on the property. Three additional piezometers were installed.**
Task 4 Borrow Soil Evaluation	<i>No additional professional services provided for this task.</i>
Task 5 Updated Topography & Volume Calculations	Two additional volume calculations and landfill capacity evaluations were performed using landfill topography surveys obtained by drone-acquired photographic data (2022 and 2024).**
Tasks 6 and 7 Finalize Design, Update Existing Plans, and Permit Modification	Additional design/permitting services associated with incorporating the north-adjacent parcel included:** - Designed new disposal boundary, landfill cells, base grades, top of waste grades, and final cover grades - Developed new perimeter grading - Re-designed perimeter drainage channels and culverts to handle larger volume of stormwater - Located and designed two new stormwater ponds - Designed stormwater infrastructure (terraces, letdowns) - Collected additional survey data - Performed a floodplain fill evaluation and prepared a floodplain fill permit application for future submittal
Task 8 CAPEX Planning	<i>No additional professional services needed for this task.</i>

*** County agreed unused budget in completed or potentially completed tasks (such as Tasks 1.1, 2, and 4) could be utilized for this work.*

Franklin County C&D Landfill Expansion

Remaining Tasks and Estimated Fees

SCS anticipates the following remaining tasks will be completed for the estimated fees summarized below. Work will be completed in accordance with the 2021 proposal; that is on a time and materials basis in accordance with the SCS Fee Schedule rates in place at the time of service (current Fee Schedule is attached).

TASK	ESTIMATED FEE (Remaining Services)
Project Management and Meetings Includes up to two meetings (in-person or virtual)	\$5,000 - \$10,000
Task 1 – Develop Landfill Footprint	----
Task 2 – MSW Assessment	----
Task 3 – Groundwater Separation Assessment	----
Task 4 – Borrow Soil Evaluation	\$8,000 - \$10,000 (potential – may not be needed)
Task 5 – Updated Topography & Volume Calculations	----
Task 6 – Finalize Design and Update Existing Plans and Task 7 – Permit Modification Application Address KDHE comments following their review of permit application and resubmit plans as applicable. File Plat of Survey with the County Register of Deeds and provide filed version to KDHE. Final printing/production of approved plans.	\$5,000 - \$10,000
Task 8 – CAPEX Planning See scope of services below, as presented in 2021 proposal.	\$35,000 - \$40,000 (as approved previously)
Total Remaining Estimate:	\$53,000 - \$70,000
Current Remaining Budget (as of 12/31/2025):	\$27,000

Task 8 – CAPEX Planning

(June 17, 2021 Proposal, Approved by County on June 30, 2021)

As discussed during the County Commissioner's Study Session on April 19, 2021 and during our meeting on May 4, 2021, planning for Capital Expenditures (CAPEX) will help the County prepare for various construction and operational activities. The purpose of CAPEX planning is to outline future

landfill development in an effort to optimize the overall operation and life cycle of the facility, while also serving as a planning and budgeting tool for the County. SCS will assist the County with preparation of a CAPEX Plan while KDHE BWM is finalizing their review of the permit modification, and/or shortly after the permit modification is processed. The CAPEX Plan will provide a “road map” for future capital and operational changes, and will include timeframes and budgetary capital costs. Items to consider in the CAPEX Plan may include:

- The timing of construction activities and what activities should be considered for the “initial construction” (for example, storm water ponds and perimeter ditches);
- The criteria triggering the need for opening a new cell;
- Development of conceptual intermediate grading plans for subsequent phases. These conceptual plans will not be suitable for construction, but will provide general surfaces for estimating volumes and determining when it may be appropriate to develop certain storm water management structures, or relocating infrastructure, or making other major facility decisions; *[June 2021 proposal included assumption that conceptual intermediate grading plans will be prepared for up to four phases of construction. The plans will not be intended for submittal to the KDHE BWM or considered construction-ready.]*
- The timing for constructing final cover over portions of the landfill;
- Construction budgetary estimates; and
- The need for additional equipment or personnel.

SCS will schedule an initial CAPEX Planning kick-off meeting with the County to discuss and select the basis for the planning, such as forecast timeframes (planning for the next 10 years, 20 years, etc.), and determine appropriate assumptions for budgetary estimating. As the CAPEX Planning progresses, SCS anticipates two to three additional progress meetings will be appropriate. These meetings may be via conference calls, video calls, or in-person, as deemed most beneficial.

We will provide a written/electronic plan that can be considered a “living document”, so the County may update, revise, or expand the plan as actual activities occur.

2026 FRANKLIN COUNTY CONTROL PLAN

The purpose of the Noxious Weed Control Plan is to outline for the Kansas Department of Agriculture Plant Health Division the methods which will be used to promote Noxious Weed Control within Franklin County during 2026.

This document will spell out the priorities by which we operate in the Noxious Weed Department. County Commissioners have the option to shift our areas of emphasis at anytime during the course of the year for budgetary or philosophical reasons.

NOXIOUS WEED CONTROL PHILOSOPHY

There are six noxious weed problems in Franklin County: Musk Thistle, Field Bindweed, Johnsongrass, Sericea Lespedeza, and Cut-leaf Teasel and Common Teasel. Musk Thistle and Teasel receive the highest level of attention based on the fact that they are easily spread by the wind onto adjacent property. We believe that landowners have a right to be protected from being seeded by their neighbors. We do not hesitate to force a landowner to control their Musk Thistle/Teasel after a period of time trying to convince them to control the problem.

Field Bindweed is a problem on private lands and county right-of-way and can be easily spread. We offer chemicals to help control Field Bindweed and help with the enforcement of control.

Johnsongrass can be spread fairly easily and is rapidly becoming a problem. We will be putting more resources towards the control of Johnsongrass in 2026.

Sericea Lespedeza seems to be spreading throughout the County. Landowners are becoming more aware of this weed. Field Bindweed, Johnsongrass and Sericea Lespedeza receive almost equal amount of attention from our County.

Cut-leaf teasel and Common Teasel were new additions to the list in 2021. Franklin County declared it as a County Option Noxious Weed through the

Kansas Department of Agriculture. We will be treating Teasel at the same time as we are treating Musk Thistle. It is located mainly along the intersecting points of the Highway systems and our county road infrastructure, but is invading other areas of the county as well.

NOXIOUS WEED CONTROL ON COUNTY PROPERTY

Franklin County operates under a county-wide road maintenance plan. While individual townships exist for many functions (cemeteries, fire districts, community buildings, etc.), roadways are controlled by the County. Franklin County has 1,135 miles of roads. Approximately 200 miles of these roadways are hard surfaced roads with the balance being gravel or dirt roads.

In addition to right-of-ways, Franklin County owns several parcels of property in the county and four radio tower sites to keep weed free throughout the year.

There are approximately 10,000 people living in the area outside the cities in Franklin County. We believe it is important to set an example to landowners by controlling noxious weeds on county properties. It is impossible to control 100% of the noxious weed problems on the right-of-way, but because we have worked on problem areas over the past several years, we find the problem areas are improving.

Franklin County has a program for landowners who object to chemical applications on the right-of-way along their property. These areas are posted with signs to assist our applicators in avoiding spraying these

areas. The landowner is expected to control noxious weeds on these areas. If the problems are not addressed, we have the right to spray the area. (See appendix).

TREATMENT PLANS

In 2025, Franklin County chose to start using a Custom Blend of chemicals on County right-of ways. This custom blend consists of Tordon 22K, Freelex, Highnoon, Escort and Liberate chemicals. By using this blend of chemicals we can treat most of the noxious weeds in our county with a one-pass treatment of the roadsides instead of having to go back and treat the same areas multiple times with different individual chemicals. This is proving to be cost effective in not only chemicals, but also in labor and wear and tear on our trucks and spray equipment. Another benefit of this blend of chemicals is that it covers time periods from pre-emergence clear through to the seeding stage.

The **Musk Thistle** which we have on county roadsides is mostly scattered. We solid spray in early spring or late fall, using the custom blend mix, on areas which were adjacent to infested properties from the previous year. Weather permitting, we begin spraying in late March to early April. We use one truck until late April or early May (see appendix for truck and employee schedules). We begin to use 2 people in the spray trucks when the thistles start to bolt. With two people per truck, we can spot spray both sides of the roadways as we come across problem areas. Thistle will begin to bud and/or bloom by mid to late May. With the custom blend mix

of chemicals, we feel we can get better treatment in place to help eradicate the thistles in a timelier matter. We will continue to spray for thistles until seeding begins.

If we find heavily infested areas where spraying is not going to be effective, we can pluck the heads, bag them, and dispose of them where they will not infest other properties.

Field Bindweed is a growing problem on the County right-of-ways because it is easily spread by road graders. We make every attempt to control Field Bindweed along the right-of-way while we are treating Musk Thistle in the spring and early summer months. We treat Field Bindweed with the Custom Blend chemical mix. Applicators mark the treated areas on a map so that we can go back to problem areas after the conclusion of Musk Thistle season and we can also do follow up in the fall.

Johnsongrass is becoming a bigger problem on the right-of-way. Small spots are treated when we treat Musk Thistle and Field Bindweed. We use our side tanks on our spray trucks to carry the proper chemicals for Johnsongrass.

In early season, we treat Johnsongrass with 1 oz per acre rate of Sulfosulfuron (OutRider). In late season, we boost this rate to 1.5 oz per acre.

Sericea Lespedeza is found on our right-of-ways. We are currently marking those spots during the June through July period for treatment with our Custom Blend chemical mix at a rate of 1oz per acre.

Common Teasel and Cut-leaf Teasel have very similar growth patterns and biological make-up of Musk Thistle. We handle the treatment with the Custom Blend chemicals at a rate of 16 oz per acre. We do a fall application on areas that are more heavily infested, as well.

NOXIOUS WEED CONTROL ON STATE PROPERTY

We do not treat any KDOT right-of-ways. KDOT hires private contractors for noxious weed control.

Whenever we find or have a problem with noxious weeds on the Prairie Spirit Trail, or the Flint Hills Trail, we will contact the manager of the Trails and they will take care of the problem. The Prairie Spirit Trail runs from Ottawa south to the Anderson County line. The Flint Hills Trail runs east and west from Miami County to Osage County lines.

NOXIOUS WEED CONTROL WITHIN CITY LIMITS

Noxious Weed problems with the cities are treated as they are on private lands. We contact each City's Public Works Department when there is a problem on city property. Our results with this method are somewhat mixed. Some years they do a better job than others, but we have never been told they would not take care of Noxious Weed control.

With Johnsongrass and Field Bindweed, their methods are usually mechanical as they have a reluctance to use chemicals within the city limits. Because these two noxious weeds are relatively common within the city limits, we have never made an issue of these control methods.

NOXIOUS WEED CONTROL ON PRIVATE PROPERTY

The purpose of the Noxious Weed Law is to assist landowners in the control of noxious weeds which have a negative impact on agricultural land.

Our primary goal is to provide the information necessary for landowners to recognize and control noxious weeds on their property. Our secondary goal is to assist them with the materials and equipment necessary to practice the control of these weed problems. Our third goal is to assist landowners in protecting their property from being contaminated by adjacent landowner's noxious weed problems.

Franklin County accomplishes these goals somewhat differently for each noxious weed. Franklin County provides rental equipment for use on noxious weeds within the County. (see appendix for a list of equipment.)

NOXIOUS WEED CONTROL ON RAILWAYS

There are two railroad operations in the County. The Burlington Northern-Santa Fe Railroad and Union Pacific, which contract their noxious weed control to private contractors. We routinely check them to make sure that the noxious weeds are treated.

MUSK THISTLE ON PRIVATE LANDS

Musk Thistle is the primary noxious weed problem in Franklin County. There are approximately 4,000 landowners outside of the city limits. Due to an increase in people moving into the country, we are adding scores of people with small acreage every year.

In March of each year, we publish a general notice to control all noxious weeds in the Ottawa Herald.

There are landowners that did an inadequate job on Musk Thistle treated during the previous year. We follow a process of using a series of form letters for contacting landowners about their musk thistle problem (see flowchart in the appendix).

Our bottom line is that some significant effort must be made if the landowner is to avoid legal notice.

We inspect property as we treat the roadsides and on days when we are unable to spray. We address Musk Thistle complaints only after inspections by the county. The names of those who report the Musk Thistle problems are never given out.

By the time we have gotten to the warning notice stage (see letter D), we have begun to set required treatment dates.

These areas are checked on the due date, or as close as we can get to that date, because of weekends or holidays.

Under special conditions we allow for an extension of time, but the legal notice gives 7 days to complete the treatment. After the due date has passed, we re-inspect the property. If some treatment has been done, we will allow more time to finish. If no treatment has taken place, we will mow the area, spray, or both and bill the landowner for the service that was completed.

We sometimes notice Musk Thistle only after it has started blooming. If we have worked with the landowners before, we send the appropriate letter. If we have never had contact with the landowner, we send a "letter B", which notifies them of the requirements of the law. We never enforce legal notice on someone with whom we have only had a recent contact.

FIELD BINDWEED AND JOHNSONGRASS ON PRIVATE PROPERTY

These noxious weeds on private lands are handled in the same manner as Musk Thistle. We start by sending the appropriate control letter with a completion date. We issue a Warning Notice and a Legal Notice, when necessary.

SERICEA LESPEDEZA ON PRIVATE LANDS

Sericea Lespedeza has been a county problem since 1995. The southwest corner of the county is heavily infested and needs constant attention. Treatment of Sericea Lespedeza is handled the same as any other noxious weed in the county. After an inspection of the property, a control letter is issued to the landowner with a ten-day follow-up date. After reinspection, if nothing has been treated, we would move to a Warning Notice and then to a Legal Notice, if nothing has been treated in those time frames. If no actions have been taken to eradicate the problem, we then have the right to have the land sprayed, at the landowners expense.

COMMON TEASEL AND CUT-LEAF TEASEL

We handle Teasel in the same manner as Musk Thistle. We treat early in the spring and continue into June. We will then concentrate on a fall spraying program.

VEGETATION MANAGEMENT IN FRANKLIN COUNTY

The Noxious Weed Department does a moderate amount of vegetation management within the County. We will apply a three way mix of HighNoon (40 oz per acre), Piper Ez (20 oz per acre), Spike ADF (2 lb per acre), and 1% MSO to achieve bare ground weed control.

The treatments are done mid to late April of each year. We treat the County yard, Recycling Center lot, gravel shoulders along chip and sealed roads, Sheriff Department's shooting range and Impound Lot, Transfer Station and County tower sites.

Franklin County treats brush on the right-of-ways on a limited basis from mid-April through June 20th. A mixture of Metsulfuron Methyl (Escort XP) and Aminopyralid (Milestone) or Triclopyr + Fluroxypyr (Pasturegard HL) is used on brush up to 10 feet in height in areas where brush treatment has been requested by Public Works or by the adjacent landowner. If time permits, we treat brush on the main roads in the same manner.

PUBLIC RELATIONS

The weed department does a moderate amount of public relations work within the county. We give landowners the "benefit of a doubt" until they demonstrate that they are not attempting to meet their legal obligations. We have an extensive number of form letters which we use to make contacts with landowners (see appendix).

The County Commissioners and County Administrator will be informed about progress in the noxious weed department on a regular basis, particularly regarding legal notices. Major purchases and new programs are covered during these meetings with the result that we are generally given a wide latitude in which to operate.

FACILITIES AND EQUIPMENT

We have excellent facilities and equipment in Franklin County. We have 2 computers, a copier and other necessary office equipment to assist us in doing the paperwork necessary to run our program.

Our break-room area is used for doing the daily reports by our spray crews. Our shop is fully equipped and we have a storage barn for equipment, which helps keep the equipment in good shape.

We rebuild spray trucks annually. We replace hoses, as needed, and rebuild our pumps annually. Solenoid valves, handguns, etc. are serviced during the winter. Our sprayer motors are replaced every two to three years on average. Our trucks are serviced at factory recommendation and our spray equipment every 8 hours. Major overhauls are done during the winter on an as needed basis. One truck is replaced every 4 years. We expect each truck to last 12 years. Our five rental sprayers are reconditioned each winter. They are serviced April through September on a daily basis, by our employees, prior to the beginning of right-of-way work.

Our noxious weed shop meets all the local, state and federal safety requirements. The area is dyked to contain run-off waters. Safety equipment (ie: eye wash stations, fire extinguishers, etc) are checked weekly. Contaminated clothing is laundered at the Noxious Weed Department.

We have SDS Safety Policy information to educate our employees about potential dangers involved with their employment with the county. Documentation is kept of the training, as required by law.

Although these plans are subject to change, this control plan fairly represents our intentions for noxious weed control during 2026.

2026 Management Plan

For Franklin County

Rob Olson, County Weed Director

Specify the goals and priorities of the program for the coming year.

Franklin County Noxious Weed will treat the right-of-way's for noxious and invasive weeds in Franklin County. We will help educate property owners and/or tenants on the proper use of chemicals, application rates, and the proper timing for treating specific noxious weeds. Chemicals will be sold to the public at a reduced cost share rate for noxious weed use.

Specify the goals and priorities of the program for the next five years.

We will continue to build better and stronger bonds between landowners and the Noxious Weed department. We will continue to work toward the eradication of smaller infestations of noxious weeds in Franklin County.

Describe the areas which noxious weed species are known to occur within the county and specific locations of new infestations and areas particularly susceptible to new infestations.

Field bindweed	Field Bindweed is usually found in the SW and NE areas of the County. This is mainly spread by road maintainers.
Musk thistle	Musk Thistle is found primarily in the NE and SW part of the County. New infestations are being kept to a minimum by our control methods.
Sericea lespedeza	Sericea is spreading. Highest concentration is in the east and SW areas of the County. Working on eradication in these areas, but also aware of surrounding areas.
Johnsongrass	Johnsongrass is a problem in the southern third of the County. River and creek areas are highly susceptible to breakouts, as well.
Bur ragweed	NA
Canada thistle	NA
Hoary cress	NA
Leafy spurge	NA
Quackgrass	NA
Kudzu	NA

Russian knapweed	NA
<u>List any non-noxious invasive weed species you plan to control and the types of integrated weed control methods you plan on using on them.</u> We are turning our attention toward Poison Hemlock, as well, as it is a possible health risk. Poison Hemlock will be treated with proper chemicals.	
List your planned integrated weed management goals and procedures, with emphasis on noxious weed control on private land, including but not limited to biological control agent selection and distribution, pesticide selection and application and cultural and mechanical controls.	
<u>Biological Controls</u> We are still monitoring a small colony of thistle weevils in the SW portion of the County.	
<u>Chemical Controls</u> We will be using a custom blend of chemicals made up of Tordon 22K, Freelex, HighNoon, Escort and Liberate on Musk Thistle, Field Bindweed, Sericea Lespedeza, and Common and Cut-leaf Teasel. We will be using sulfosulfuron and /or imazapic on johnsongrass.	
<u>Cultural Controls</u> NA	
<u>Mechanical Controls</u> <u>Arrange with the Road & Bridge Dept to mow spots when necessary.</u>	

Estimate the projected personnel, operations, and equipment costs of the proposed program.

Personnel costs	\$108,803.00
Operations costs	\$215,550.00
Equipment costs	\$20,000

List the methods you plan to use to encourage compliance and the enforcement actions you will take if necessary.

Chemicals will continue to be sold to county landowners at a cost share price for noxious weed use.

We will publish the General Notice in the official County newspaper in March.

All warnings/issues/notices to landowners will be sent through the USPS or other carriers, if needed.

List your plans for working with state and/or federal agencies to control the noxious weeds on state and/or federal lands.

Franklin County will be in contact with KDOT and/or Kansas Rails for Trails if there are problem areas on their properties. Kansas Department of Wildlife, Parks and Tourism will be contacted if the problem areas are on the Rails for Trails. Franklin County will offer assistance to these entities to resolve problem areas.

Describe your education and outreach plans for the coming year. Include training and professional development for yourself and your staff. (Attend District meetings? Annual Conference? Recertification?)

We have brochures available to the public identifying noxious weeds.

We will attend District meetings, attend producer meetings, as time allows, and attend the CWDAK Annual Conference to gain certification training.

List the facilities and equipment available for use in managing the noxious weeds in your county, including a list of the equipment available for rent to the public and the rent you charge.

Franklin County has three trucks equipped with 400 gallon spray units. These are used to maintain the approximately 2000 miles of roadside and other County properties. We have a chemical storage facility that has a berm and also houses our truck loading/mixing area.

Franklin County offers 5 pull-type spray units to the public for their use in treating noxious weeds. These are easily pulled with a truck, small tractor or UTV. We offer (2) 200 gal, (2) 300 gal and (1) 400 gal units. These are available to rent from Franklin County for a daily rental fee of \$20.00.

**Annual Noxious Weed Eradication Progress Report
as required by KSA 2-1316**

2025

Franklin County

The weed supervisor shall make annual surveys of noxious weed infestations and ascertain the approximate amount of land and highway or any kind of right-of-way infested with each kind of noxious weed and its location in the county not later than October 31 of each year. The weed supervisor shall compile data on areas eradicated and under treatment and any other data the secretary may deem necessary and submit, by March 15 of each year, an annual weed eradication progress report for the preceding calendar year to the board of county commissioners for their approval and then to the secretary for review. By March 15 of each year, the weed supervisor shall prepare and submit a management plan for the coming year to the board of county commissioners for approval and to the secretary for review.

We certify that Rob Olson is employed as Franklin County Noxious Weed Director for 2026

We approve the Annual Eradication Progress Report for Franklin County Noxious Weed Program for 2025
