

# Public Works Road and Bridge Updates

## Week of February 17, 2020

*Monday, February 17, 2020 general County offices and departments were closed in observance of President's Day.*

- Last week during routine road maintenance activities, a 1920's era Box Culvert bridge failed when the County maintainer crossed the box. The road was immediately closed and the structure was inspected. A local concrete company has begun repairs. Weather permitting, the work should be completed and road re-opened by the end of next week or early the first week of March. We apologize for an inconvenience this closure has caused. Pictures of the damaged Box Culvert bridge are below.

- Throughout the week, several loads of fill material have been hauled to the transfer station to be used in covering remnants of construction material that is allowed to be buried.
- Thursday morning crews treated parking lots and main roads. The continuous winter weather has hindered progress on road construction projects. In the meantime, crews are working hard in the shop preparing vehicles and equipment for spring construction weather.
