

**FRANKLIN COUNTY
COMMISSION AGENDA ITEM**

TO: BOARD OF FRANKLIN COUNTY COMMISSIONERS	Reviewed:
FROM: Philip Dudley	Ext: 3420
DEPARTMENT: Appraiser	
DATE: Monday, August 31, 2009	No:

ITEM: Discuss the acceptance of four new Dell Computers at no cost to the county for use in the Appraiser's office to operate the new ORION valuation system.

Background: Due to the configuration and specifications of the current computers in the County Appraiser's Office, the mouse sketch program in the ORION appraisal system does not function correctly. This was discovered after multiple unsuccessful attempts by Franklin County IT, KDOR IT, and Tyler Technology IT programmers to get the sketch program to operate on multiple machines in the Appraiser's Office. It is my opinion that we have exhausted our options in attempting to test and make the ORION software operate correctly on the current computers within the office. To remedy this situation, KDOR has offered to provide to the County, at no charge, four computers for the Appraiser's Office. It is my recommendation that the County Commission accept these four new Dell computers at no cost to the county.

Recommended Action: Discuss the acceptance the four computers from KDOR.
